Phil DeBruzzi is a Managing Director at Ankura, based in Chicago. He led Navigant's healthcare capital asset strategy team, acquired by Ankura in 2018. He is a senior healthcare executive with 25 years of industry experience advising and delivering sustainable capital deployment strategies. Phil takes a forward-thinking view of a health system's objectives, helping executives see the long-term needs of their business and developing appropriate asset strategies that will drive excellence in their clinical programs. Phil has deep expertise advising integrated health systems, academic medical centers, children's hospitals, and specialty hospitals.

Phil's professional experience includes:

- **Multi-Campus Master Planning:** Led the network development strategy for an integrated five hospital health system leading the transition to value-based care delivery in their market and for the country.
- **Ambulatory Network Strategy:** Led the network optimization plan and long-term strategic visioning of ambulatory network following the merger of two east coast health systems.
- **New Campus Visioning:** Led the process and market analysis for the development of a new hospital campus with strong presence and programs in outpatient care, wellness.
- **Ambulatory Surgery Center Feasibility Assessment:** Led the market analysis, visioning, and financial modelling (ownership structure and pro forma) to determine the right scale and specialties for development.
- **Operational Visioning for Ambulatory Center:** Led the visioning and value stream mapping of a 200,000 square-foot facility containing various primary care clinics and medical specialties.
